

LS Pinner

Pneumatically-driven headless, slight- and medium-headed pins for manufactured housing, interior trim, furniture and woodworking finishing applications.

The Senco® LS1, LS2 and LS5 pinner precision drive six popular lengths of 18-gauge headless, slight- and medium-headed pins. The tapered nose of the tools enables the operator to accurately position the fastener even in those hard-to-reach areas. The pin design results in a neat, virtually invisible fastening point.

Applications

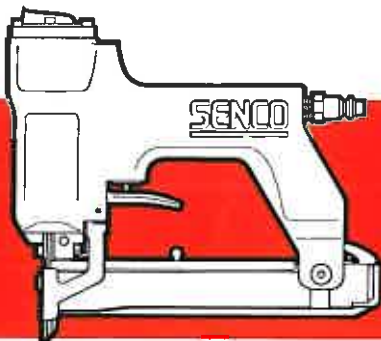

Molding and decorative trim applications in mobile home, on-site and manufactured home construction. Also furniture applications including attachment of decorative wood and plastic pieces, pinning upholstered trim panels to chairs and sofas, rattan furniture and other operations requiring blind pinning.

Picture frame assembly becomes a simple task with the LS. Other uses include window beading and holding dowel joints, chair rungs, corner blocks and other components in place while glue is setting.

Cabinetmakers, vanitory producers, toy manufacturers and numerous other industries use this economical Senco fastening system for faster production.

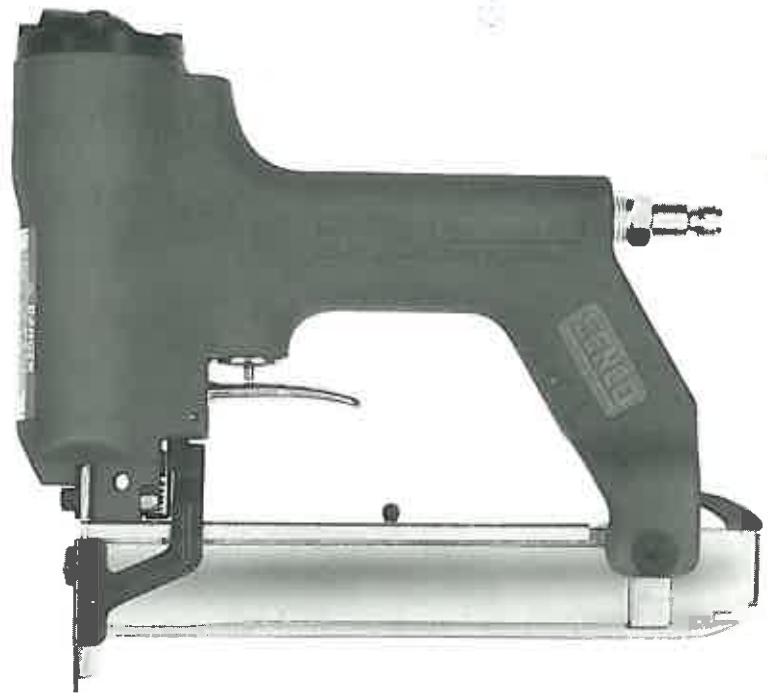

Features:

The compact LS pinner are designed for easy maneuverability in small places. They are lightweight (2.7 lbs.) for easy handling. The bottom-load magazine is quick to load to minimize reloading downtime. The length selector enables operator to quickly convert the LS1 to drive 1/2", 3/4" and 1" pins; LS2 to drive 5/8", 3/4" or 1" pins; and the LS5 drives 1", 1 1/4" and 1 1/2" pins. These easy-to-operate tools require minimum maintenance.

LS Pinner

Tool Specifications

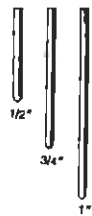

Tool Weight: 2.7 lbs.
 Height: 7³/₄"
 Length: 8¹⁵/₁₆"
 Lip Length: 1/2"
 Pin Capacity: 100
 Mode of Operation: restrictive trigger
 Reg. Operating Pressure: 80-110 p.s.i.g.

Fastener Specifications

LS pinner drive 18-gauge (.050" x .039") pins.

Headless Pins (Model LS1 Pinner)

Lengths	Inches	1/2"	3/4"	1"
