Making a Good Thing Better: SENCO Unveils Second-Generation DuraSpin Tools

*Visit SENCO's booth at IBS (Booth #4309) to see the
new DuraSpin DS202-14V & DS205-14V in action.*

(CINCINNATI) – Since their introduction four years ago, SENCO's original two DuraSpin screw system tools have won over users by the thousands. Why? The combination of an innovative collated feed system, outstanding design and powerful motors meant work got done both faster and better. So, it is no surprise that the introduction of SENCO's second generation of hand-held DuraSpin tools has been eagerly anticipated by users nationwide.

“The DS202-14V and the DS205-14V pick up where we left off with the DS200 and DS162,” says Dave Boyles, SENCO's New Technology manager. “We've simply taken two of the world's best-performing screwdriving tools and made them even better.”

Both the DS202-14V and the DS205-14V start with SENCO's proven cordless, collated-feed design, which offers 50 drives between reloads. From there, SENCO added a number of impressive new features in direct response to user feedback. Gone are the old post-style batteries. In their place, SENCO has upgraded to sturdier 14.4-volt slide batteries. Other new features include a convenient reverse switch and new inexpensive and easy-to-change drive bit tips.

DuraSpin Tools
2-2-2-2**

The new DuraSpin DS202-14V takes the place of the popular DS200-14V platform as the do-

it-all performer in the DuraSpin stable. Perfect for any number of wood-to-wood or drywall applications, the DS202-14V is powerful and versatile enough to drive a wide range of fasteners (1"-2" in length for #6-#8 screws) into a variety of finishes. Easy depth-of-drive adjustment, a 2,300 RPM high-torque motor and a patented clutch design ensure outstanding performance in a long-lasting package. With the ability to drive 350-650 screws per battery charge, the DS202-14V will keep any project on schedule.

Drywall contractors will immediately take note of the new DuraSpin DS205-14V. The second-generation incarnation of the time-tested DS162-14V, SENCO's new drywall specialist offers a whole host of features designed to keep busy drywall crews moving forward. The 4,000 RPM motor ensures fast, precise fastening of drywall to either wood or steel studs. With a fastener range of 1"-2" (#6 screws) and a simple depth-of-drive adjustment, the DS205-14V is extremely versatile. The quick bit release, replaceable drive bit tips and powerful battery (710-1100 drives per charge) provide reliable, high-speed operation. And the combination of great balance and advanced ergonomic design ensure all-day comfort.

Each of the new tools comes complete with two 14.4-volt batteries and a one-hour "smart" charger to minimize jobsite downtime. The new DuraSpin tools also include extra drive bit tips and rugged carrying cases. Both tools are covered by SENCO's one-year factory warranty. Based in Cincinnati, SENCO is a leading manufacturer of power fastening systems; air and battery power nailers and staplers, screw systems and the fasteners they drive. SENCO tools are used in a variety of industries, including home construction and remodeling, woodworking, cabinet and furniture assembly, manufactured housing and industrial packaging.
