New SENCO® Mini-Compressor Combo Kits Offer Big Performance in Small Packages

Visit SENCO's booth at IBS (Booth #2927) to see the SFW08 and FIP10 Combo Kits in person.

(CINCINNATI) – Building on the overwhelming success of its first mini-compressor combo kits launched in 2003 and 2004, SENCO® is introducing two new kits aimed at carpenters who specialize in detailed finish work and fine furniture assembly.

SENCO's SFW08 upholstery stapler kit and its FinishPro® 10 micro-pinner kit are both assembled around SENCO's portable and convenient PC1010 mini-compressor. The lightweight, 20-pound compressor features 1/2 hp, a one-gallon tank, direct-drive, lubeless pump for efficient operation and is capable of delivering 20-44 drives per minute, depending on the tool and application. Since its introduction in 2003, the great performing compressor has remained one of SENCO's hottest selling items.

“This compressor has been a hit with contractors, DIYers, woodworkers and craftsmen due to its quiet operation, ample power and extreme portability,” says SENCO product manager Randy Kleeman. “It is small enough to take along or just leave on top of the workbench, but it's powerful enough to tackle just about any finishing project.”

The **SENCO SFW08 Upholstery Stapler Combo Kit** includes a 22-gauge stapler. The SFW08 drives 3/8" crown staples 3/8" to 5/8" in length and is perfect for precision stapling applications, such as auto and marine vinyl trim, insulation, upholstery, roofing felt, cabinet backs, picture frame assembly and light finish and trim work. The SFW08 kit is available through SENCO dealers nationwide for \$195.

The **FinishPro 10 Micro-Pinner Combo Kit** features one of SENCO's most unique pneumatic tools, a powerful 23-gauge micro-pinner. Originally designed for small assembly applications, the FinishPro 10 has become increasingly popular in recent years among finish carpenters and cabinet builders doing highly-precise work with delicate trim pieces. The FinishPro 10 drives 23-gauge headless pins from ½" to 1" in length, offering versatility and a perfect finish for decorative trim, glazing bead, cabinet doors, behive assembly, picture frames and even trim tacking, where adhesive is the primary fastener. The FinishPro 10 kit retails for only \$239.

Each combo kit also includes 25 feet of hose, necessary fittings, safety glasses, a pack of fasteners and tool oil. The kits are available exclusively through authorized SENCO dealers nationwide.

Part of SENCO's ProSeries line of pneumatic tools, the SFW08 and FinishPro 10 include a variety of high-quality features, such as adjustable depth-of-drive (FIP10 only), rear exhaust and more. Both tools are also covered by a full one-year warranty from SENCO.

Based in Cincinnati, SENCO is a leading manufacturer of power fastening systems; air and battery power nailers and staplers, screw systems and the fasteners they drive. SENCO tools are used in a variety of industries, including home construction and remodeling, woodworking, cabinet and furniture assembly, manufactured housing and industrial packaging.
