SENCO's New Wheelbarrow Compressors Perfect for Demanding Jobsites

*Visit SENCO's booth at IBS (Booth #4309) to see the
new PC2017 and PC2016 compressors in person.*

(CINCINNATI) – Two new top-of-the-line compressors from SENCO are sure to offer framers, deck builders, roofers and finish carpenters all the air power they need keep even their toughest projects moving forward. The PC2017 gas-powered compressor and the PC2016 electric compressor provide outstanding SENCO performance, on-demand service and durable design, all in a convenient wheelbarrow package.

Driven by a powerful 5.5 HP Honda gas engine, PC2017 is the cream of the crop among SENCO's portable compressors. With a sturdy cast-iron pump and eight gallons of air storage in its twin tanks, the PC2017 is perfect for framing and sheathing, decking, roofing and finish work.

The PC2017 is capable of delivering 10.6 cfm at 40 psi and 9.0 cfm at 90 psi, with a maximum pressure of 125 psi. With a maximum pump-up time of 54 seconds and recovery time of only 14 seconds, the PC2017 keeps workers moving. And, thanks to its large capacity oil-splash design, the PC2017 can be pushed hard all day every day.

Other features of the PC2017 include a stainless steel braided discharge hose to reduce heat and wear, an auto start/stop feature (continuous run optional), 10" fly wheel for extra cooling and longer life and easy-to-read regulator and outlet pressure and tank pressure gauges. The PC2017 is covered by a one-year factory warranty (two years on the pump).

Wheelbarrow Compressors
2-2-2-2

For clean and reliable electric air compression, SENCO's new PC2016 is the perfect choice. With a host of features not found on any other comparable compressor, the PC2016 is sure to become popular among framers, roofers, deck builders and finish carpenters. The electric compressor is built

around a sturdy cast-iron pump with a large oil reservoir for long life and reliable service. The UL listed, industrial grade 1.5 hp electric motor delivers 7.2 cfm at 40 psi and 6.6 cfm at 90 psi. The two four-gallon tanks are ready to produce the maximum pressure of 125 psi in only 96 seconds, with a recovery time of only 17 seconds.

From the standpoint of performance features, the PC2016 is a mirror image of its gas-powered counterpart – stainless steel braided discharge hose, 10” flywheel, auto start/stop, easy-to-read gauges, and more – and shares the PC2017’s built-to-last construction. The PC2016 is also covered by a one-year factory warranty (two years on the pump.)

Both compressors are currently available from SENCO dealers nationwide. For a complete listing of dealers and complete specifications, visit www.senco.com.

Based in Cincinnati, SENCO is a leading manufacturer of power fastening systems; air and battery power nailers and staplers, screw systems and the fasteners they drive. SENCO tools are used in a variety of industries, including home construction and remodeling, woodworking, cabinet and furniture assembly, manufactured housing and industrial packaging.
